

# SecurePlusVPN

## Secure Client User Guide

### 1. Main Screen and Key Functions

On the main screen of the application, you can see a list of available VPN configurations. Here you can:

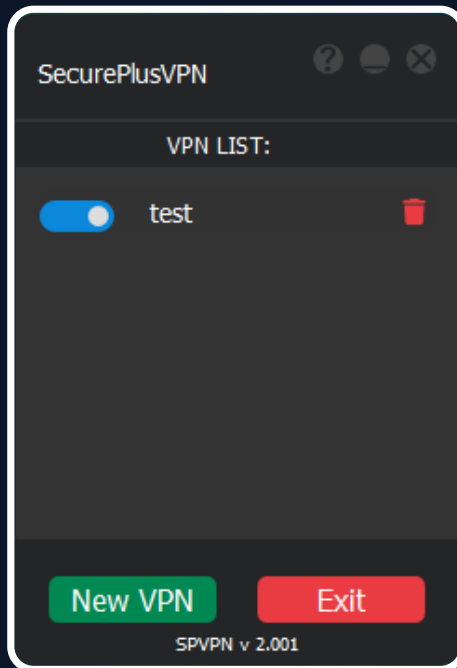

- **Turn VPN On/Off:** Use the toggle switch next to the configuration name (**red = off, blue = on**).
- **Add a new VPN:** Click the **New VPN** button to add a new VPN configuration.
- **Delete VPN:** Click the **trash icon** to delete an existing configuration.

### 2. Enabling and Disabling VPN

To activate the VPN, toggle the switch next to the configuration name. When the VPN is active, the button is blue.

To disable the VPN, click the toggle switch again, which will turn red, indicating the connection is off.

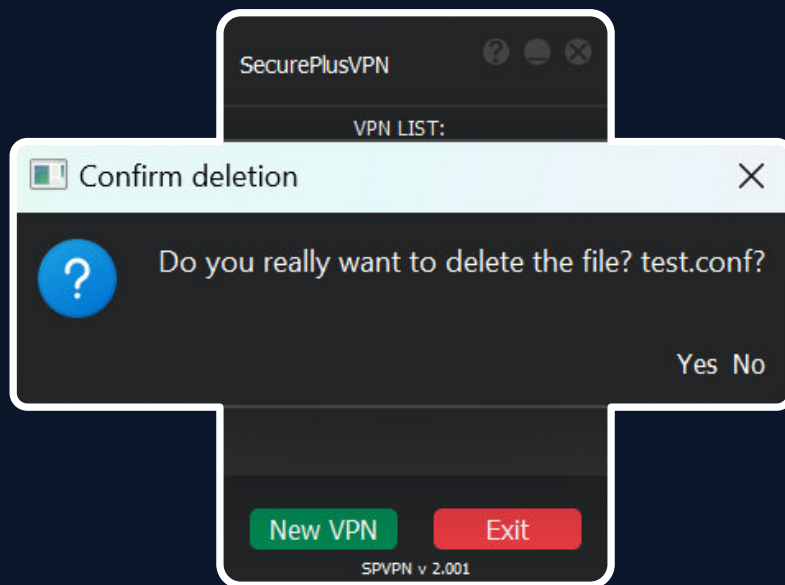

### 3. Deleting a VPN Configuration

If you want to delete a VPN configuration, click the **trash icon** next to the respective configuration.

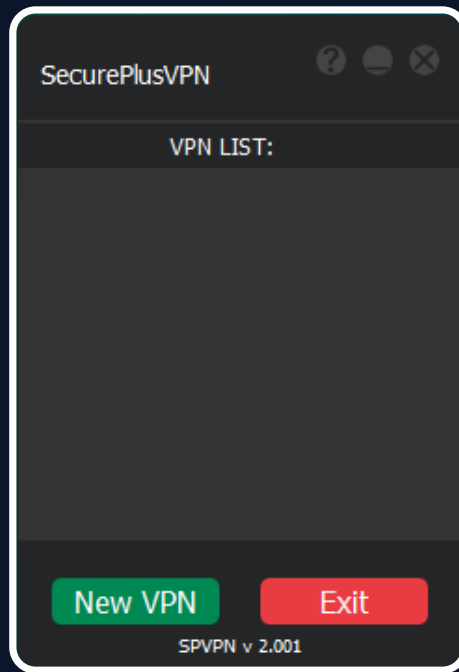

A confirmation dialog will appear, asking if you really want to delete the configuration.

Confirm the action by clicking **Yes**.

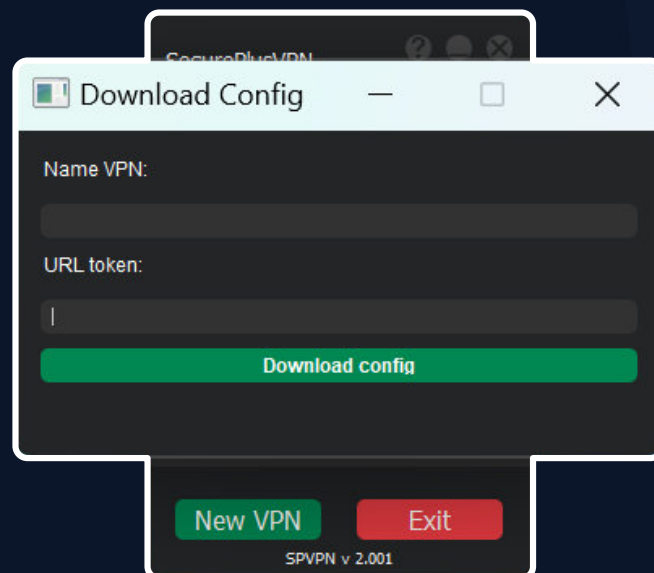

## 4. Adding a New VPN Configuration

1. Click the **New VPN** button.
2. Enter the name of the new configuration in the **Name VPN** field.
3. Enter the **URL token** you received from the VPN provider into the **URL token** field.
4. Click **Download config** to download the configuration.

## 5. Entering Information for Configuration Download

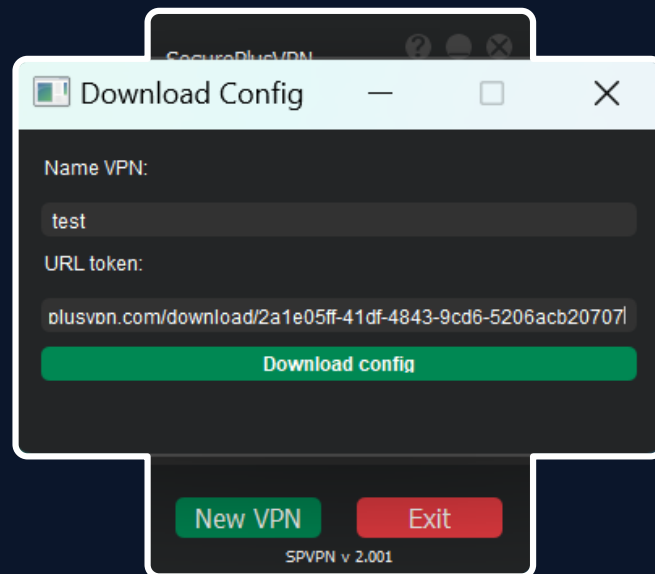

After filling in the form with the VPN name and the URL token, click **Download config**. The application will download and save the configuration file.

## 6. Closing the Application and Disabling an Active VPN

When you close the application, a confirmation dialog will appear asking whether you want to close the application and end the active VPN connection.

Confirm the action by clicking **Yes**.

## 7. Generating a Token on config.secureplusvpn.com

To generate a token for your VPN configuration, follow these steps:

1. Go to the website **config.secureplusvpn.com**.
2. Fill in your VPN details as required in the form.
3. After submitting the form, a unique token will be generated.
4. The token will be sent to you via email or displayed on the screen.
5. Copy the token and paste it into the **URL token** field in SecurePlusVPN to download the configuration.
